PRODUCT FACTS

Desk Update

Issue May 2009 Product Desk Update Pages 5

Brief Description

When PC systems are installed, MS Windows may not provide all required drivers. Therefore "Desk Update" allows an easy installation and update of all drivers with minimal effort.

Desk Update is available on the OEM DU-DVD.

Benefits

- Automatically identifies the installed mainboard
- Easy installation of all required drivers and important patches for MS Windows
- Only one reboot required

Note: The latest OEM DU-DVD is available on the OEM FTP Server (ISO image file)

Detailed Description

After inserting the DU-DVD, the following startup screen appears.

The mainboard and operating system that are used will be identified automatically.

There are two options to update the system:

- 1. Automatic Installation
- 2. Manual Installation

Both options are explained on the following pages.

The OEM DU-DVD offers various manuals for the mainboards, the "SystemGuard"-utility (see specific Product Fact) for monitoring system temperatures and fan speed, and weblinks for drivers and additional manuals.

1. Automatic Installation

By choosing the automatic installation, a new window opens and scans the system for missing or outdated drivers, and displays the results for available updates.

After clicking "Install All" the Software License Agreement has to be accepted to continue the installation.

DeskUpdate		
Please read the following contract. Use the page down key to read the rest.		
Fujitsu Technology Solutions Software License Agreement for End Users		
1. Subject of this Agreement		
1.1 For the purposes of this agreement "Software" shall mean the software with the object code, the version and the specification indicated in the software product data sheet of Fujitsu Technology Solutions. The Software consists of machine-readable instructions and/or		
Do you agree to the terms of the contract?		
If you do not agree to the terms of the contract the installion will Exit. It is required that you agree to the contract for the installion to continue.		
[I Agree] I Disagree		

Then the drivers will be installed. After the installation has finished, a system reboot will be requested. Now the system is completely updated.

2. Manual Installation

The "Manual Installation" allows to select manually any driver for the mainboard and (re-)install it. The installation starts after clicking on the right-hand icon.

A popup window showing detailed information about the driver appears.

(For installing a Windows Hotfix, a folder, where different localized versions of the patch are available, will be opened. The language of the MS Windows installation needs to be selected.)

The related files will be unzipped to the hard disk.

WinZip Self-Extractor - 1022008_intel_9_0_0_	1007.ехе 🗶
To unzip all files in this self-extractor file to the specified folder press the Unzip button.	Unzip
Unzip to <u>f</u> older:	Run <u>₩</u> inZip
